

Shubham Pawase

Data Engineer

Pune, India | shubhampawase078@gmail.com | +91 9503624087 | <https://www.linkedin.com/in/shubham-pawase-362200238>

PROFILE SUMMARY:

- Data Engineer with **3.7+ years of professional experience** in building scalable data pipelines and analytics solutions on **Google Cloud Platform (GCP)**.
Data Engineer with hands-on experience in **building scalable batch and real-time pipelines, data-driven APIs**.
- Data Engineer with hands-on experience in **building scalable batch and real-time pipelines, data-driven APIs and ETL/ELT solutions** across **GCP, Bigquery, Hadoop, Hive**. Skilled in **Python, PySpark, SQL, and Spark** with a proven record of improving **data quality, automation, and SLA compliance**.
Proven ability to analyze, evaluate, and **optimize data workflows while collaborating in Agile/Scrum environment**.
- Hands-on experience with **BigQuery, Dataflow, Cloud Composer (Airflow), Google Cloud Storage (GCS), and Pub/Sub** for developing batch and near real-time data processing workflows.
- Experience in developing and maintaining **Looker dashboards**, creating explorers and LookML models to deliver accurate KPI reporting and business insights.
- Collaborated with cross-functional teams to translate business requirements into reliable data solutions and **BI reporting layers**.
- Developed **interactive dashboards and reports** using **Looker and LookML** to drive data-driven decision-making.
- Strong working knowledge of **BigQuery data modeling and query optimization**, including partitioned tables, transformations, and performance tuning.
- An **AWS Certified Cloud Practitioner**
- Specialized in **SQL/PLSQL** development, query optimization, ETL pipeline design, and large-scale data migration.
- Strong Proficiency in relational databases including **Oracle, MySQL, PostgreSQL**, and tools such as **Oracle SQL Developer and MySQL Workbench**. Experienced in designing and managing ETL pipelines using **Azure Data Factory**, and integrating cloud data solutions across **AWS and Azure** platforms.
- Demonstrated expertise in **Finance & Banking, Telecom/Billing, Data Migration, ETL & Data Warehousing, and Business Intelligence** domains, with a strong focus on performance tuning and ensuring data consistency.
- Adept at collaborating with stakeholders to deliver scalable, data-driven solutions that enhance business decision-making.
- Acknowledged for strong **analytical thinking, problem-solving, adaptability, effective communication, and project management skills**, consistently contributing to the success of cross-functional teams and complex data initiatives.

TECHNICAL SUMMARY:

Skill Set	
Cloud Technologies	AWS, Azure Data Factory (ADF), GCP (Dataflow, Cloud Composer, Dataproc, Pub/Sub, BigQuery, IAM, Cloud Run, Secret Manager, Cloud Storage)
Database	Oracle, MySQL, PostgreSQL, SQL Server
Data Warehouses	Data Warehousing Concepts, ETL Pipelines, Data Lakes

Shubham Pawase

Data Engineer

Pune, India | shubhampawase078@gmail.com | +91 9503624087 | <https://www.linkedin.com/in/shubham-pawase-362200238>

Data Visualization Techniques	Power Bi ,Reporting and Analytics ,Looker
Programing Languages	Java, SQL, PL/SQL, HTML, CSS, JavaScript
Tool and Technologies	Azure Data Factory, PL/SQL Developer, MySQL Workbench, MSSQL Developer , Docker, Kubernetes, Git, GitHub, CI/CD, GitHub Action.

QUALIFICATION SUMMARY:

- **Master of Computer Applications (MCA), Savitribai Phule Pune University, 2023-2024** (First Class with 60.39 %)
- **Bachelor of Computer Science (BSc), Savitribai Phule Pune University, 2019 – 2021** (First Class with 74.00 %).

CERTIFICATIONS/BADGES:

- AWS Certified Cloud Practitioner (2024).

EMPLOYMENT SUMMARY:

- Working at Atgeir Solutions Pvt. Ltd as Data Engineer from Dec 2025 to till date.
- Worked at AvenDATA Technologies – SQL Developer (Oct 2024 – Dec 2025)
- Worked at Joulestowatts Business Solutions Pvt. Ltd – Oracle PLSQL Developer (Jan 2024 – Oct 2024)
- Worked at Blue Rose Technologies, Bangalore – Oracle BRM Developer (Jan 2023 – Jan 2024)

PROFESSIONAL SUMMARY:

Atgeir Solutions	Dec 2025 - Till Date
a) Project Title	: Snowflake to GCP Bigquery Migration
Client	: Financial client working in investment and insurance (NTT DATA CSH)
Role	: Data Engineer
Technologies	: DBT, Snowflake, Looker , Airflow, Python, AWS, GCP, Looker, GCP Services, Bigquery, Dataflow, AWS Services

Project Description:

Implement **Snowflake to BigQuery migration initiative**, redesigning data models, ETL pipelines, and workloads to enhance scalability, performance, and cost efficiency. Ensuring **data validation, benchmarking, and consistency** throughout the migration process. Collaboration with cross-functional teams to optimize queries, implement cost-monitoring strategies, and establish governance frameworks for reliable, long-term data infrastructure.

- Engineered **analytical pipelines processing 50M+** records daily using **BigQuery, PySpark, and**
- **python** reducing query execution time by **30% and ensuring SLA compliance** for business-critical dashboards.
- Operationalized workflow orchestration using **Cloud Composer (Managed Airflow)** across **40+ DAGs**,
- reducing manual intervention by 70% and improving pipeline recovery time.

Pune, India | shubhampawase078@gmail.com | +91 9503624087 | <https://www.linkedin.com/in/shubham-pawase-362200238>

- Standardized **schema evolution and incremental loading strategies across 20+ datasets**, preventing downstream reporting failures during schema changes
- Migrated **50+ analytical datasets from Teradata to BigQuery**, enabling cloud-native analytics and
- **reducing infrastructure costs by 30%** with zero data loss.
- Scaled ingestion **pipelines processing 200GB+ data/day from REST APIs, SFTP, and Cloud Storage**, reducing ingestion **latency by 45%**.

Responsibilities:

- Analyzed and refactored existing Looker dashboards and **LookML models** to ensure seamless transition from Snowflake to BigQuery with minimal impact to business users.
- Redesigned and **optimized LookML views**, explores, and derived tables to align with the new BigQuery data models and improve query performance.
- **Validated KPI definitions, metric calculations, and dashboard outputs** to ensure data consistency and accuracy post-migration.
- Improved **Looker dashboard performance** by optimizing underlying **BigQuery** queries, implementing aggregate tables, and tuning joins.
- Collaborated with finance and business stakeholders to enhance **dashboard** usability, streamline reporting workflows, and maintain governance standards.
- Supported user acceptance testing (UAT) and resolved reporting discrepancies during migration to ensure reliable and uninterrupted analytics delivery.

AvenDATA Technologies

Oct 2024 - Dec 2025

a) Project Title : SQL Optimization , Data Integration & Data Migration (Nov 2024 – Dec 2025)

Client : Boinger, PWC, Deutsche bank, etc

Role : **SQL Developer**

Technologies Used : Oracle, MySQL, PostgreSQL, SQL, PL/SQL, Azure Data Factory (ADF).

Project Description : Designed, developed, and optimized complex SQL queries, stored procedures, and triggers. Integrated ETL pipelines for automated data movement and transformation from multiple sources to cloud SQL targets.

Responsibilities :

- Analysis, Design, and Architecture of SQL queries and ETL workflows.
- Development of complex queries using CTEs, window functions, dynamic SQL, and advanced joins.
- Data migration, data cleansing, and bulk data transformations.
- Documentation of ETL processes and SQL scripts.
- Testing and performance tuning for optimized query execution.

JouleStowatts Business Solutions Pvt. Ltd

Jan 2024 - Oct 2024

a) Project Title : Database Development & Query Optimization

Client : Axis Bank

Shubham Pawase

Data Engineer

Pune, India | shubhampawase078@gmail.com | +91 9503624087 | <https://www.linkedin.com/in/shubham-pawase-362200238>

Role : Oracle PLSQL Developer

Technologies Used : MySQL, Oracle, PL/SQL, Linux, Postman

Project Description : Developed high-performance MYSQL and Oracle queries, functions, and triggers. Tuned SQL queries to improve performance and supported ETL workflows for reliable data availability.

Responsibilities :

- Analysis, Design, and Architecture of database queries
- Development of SQL procedures, functions, and triggers
- Scheduled and monitored ETL workflows using SSIS ● Documentation of database and ETL processes ● Testing and optimization of database performance.

Technologies Used : MySQL, Oracle, PL/SQL

Project Description: Worked on MySQL-based billing system functionalities and optimized queries for faster data retrieval. Ensured database integrity during system upgrades and migrations.

Responsibilities:

- Analysis and Design of billing system database structures
- Development and optimization of MySQL queries
- Documentation of database changes and running Billing invoices through PLSQL and shell script.
